### **DETAILED ACTION**

**Claims 18-32 are pending.**

#### ***Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

#### **Group I**

Claims 18-21 drawn to a product for agricultural application that comprises at least 4%(w/w) of vinasses.

#### **Group II**

Claims 22-27, drawn to a procedure for producing a product for agricultural application that comprises at least 4 % (w/w) of vinasses.

#### **Group III**

Art Unit: 1616

Claims 30-32, drawn to a method for application to an agricultural extension to be treated of a product of agricultural use in the form of granules or pellets comprising at least 4%(w/w) of vinasses.

**Claims 28 and 29 are nonstatutory and will be grouped when applicant amends the claims to conform to US practice.**

The inventions listed as Groups I,II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is a product for an agricultural application that comprises vinasses. This element does not constitute a special technical feature under PCT Rule 13.2 because the element is shown in prior art. US Patent Application 2003/0022790 teaches, in claims 1-3, a plant coating for improving the efficiency of plant nutrients that comprises a fluid byproduct of agriculture that is molasses, vinasse, or syrup, or a mixture thereof. The invention of the instant application lacks a special corresponding technical feature and does not make a contribution to the prior art. Therefore, the claims cannot be said to have unity of invention.
